ABOUT ME

I am a motivated Junior Front-End Developer with a focus on building responsive, user-friendly web applications using React.js. Proficient in HTML, CSS, and JavaScript, I enjoy creating clean, interactive interfaces and learning new technologies to enhance my skills.

PROJECTS

PrayerTimes - App   2024

PrayerTimes is a simple web app that displays accurate daily prayer times for Muslims based on their location. It features a clean interface, easy navigation, and, helping users stay consistent with their prayers.

used techs

HTML5 - CSS3 - JavaScript

EGPrices - App   2024

EGPrices is a web app that provides real-time updates on gold, silver, and Egyptian pound (EGP) currency rates. It includes a built-in calculator for quick conversions and comparisons.

used techs

HTML5 - CSS3 - JavaScript - Node.Js - Express.Js(api)

VIDL - App   2024

VIDL is a video downloader web app that lets users download videos and entire YouTube playlists. With a user-friendly interface, it supports multiple formats and resolutions, making video downloads quick and convenient.
